

was provided by a strategic investor who had participated in the first round of seed financing.

In another example, spinout company A 145 is a simulation learning company. Holding company 140 developed simulation learning intellectual property for addressing the needs of a client company in a certain market segment. The initial addressable market segment of the client company was the aerospace industry. Holding company 140 then created a new business, i.e., spinout company A 145, utilizing the simulation learning IP, to provide a simulated job learning environment for any type of corporation. Spinout company A 145 is a 100% subsidiary of holding company 140. Holding company 140 will spin out the new business as a separate operating company and assume a stake in equity, as part of the reward infrastructure.
